---

## Project Figures

|  |                             |
|--|-----------------------------|
| Crushing Capacity:                             | 2,500 t/h                   |
| Material to be crushed:                        | Granite rock                |
| Feed Size – 95% smaller than:                  | 1,100 mm                    |
| Product Size – 90% smaller than:               | 230 mm                      |
| Overall Dimensions (excl. discharge conveyor): | 27,000 x 24,500 x 28,000 mm |
| Centre Distance of Discharge Conveyor:         | 98,000 mm                   |
| Crusher :                                      | Gyratory 54 - 77            |
| Overall Dimensions:                            | 20,000 x 16,000 x 37,000 mm |
| Discharge Conveyor:                            | Vibrating Feeder            |
| Conveying Capacity:                            | 2,500 t/h                   |
| Total Weight                                   | 850 t                       |
