We are currently recruiting for:

## IT-Infrastructure Specialist (m/f/d) in a full-time position.

In this position, you will report to the Head of IT.

### Aim of the job

Responsible for designing, planning and project delivery of TAKRAF Group Infrastructure systems that will support the IT enterprise infrastructure of the organization. Implementation, support and maintenance of current, and new TAKRAF Group infrastructure systems with the ability to define a Group-wide operating standard and the capacity to guide the development of the associated policies that govern the implemented systems.

### Main tasks and responsibilities

- Complete 2nd and 3rd level support activities according to the defined internal processes.
- Compare the Group Infrastructure state (Cloud and On-Prem) with best practice and defined company policies. Analyse gaps and remediate.
- Configure, operate and maintain the IT Infrastructure systems along with the associated application software.
- Closely monitor the IT Infrastructure, based on monitoring output, ensure that all relevant systems are performing optimally.
- Analyse and evaluate software and hardware requirements, plan the corresponding procurement with approval and then install and configure the defined solution.
- Maintain hardware and software assets, manual updates, automatic updates and backups.
- Drive the continuous improvement of the Group IT Infrastructure keeping in mind IT security. Remain informed on developments within the IT industry.
- Responsible for the establishment of the required IT Infrastructure to support new Project sites.
- Occasionally carry out maintenance work on site or remotely during off-peak periods (evenings or weekends).
- Participation in after-hours standby duty, maximum 1 weekend per month.

### Professional and personal requirements

- Completed studies in computer science or professional experience through many years of work experience in a related IT field.
- Several years of professional experience in the field of operational IT infrastructure and or cloud computing.
- Excellent working knowledge and experience using SCCM, SQL, MS Server, Linux, Veeam and SAN storage.
- Extensive knowledge around server and virtualisation technologies (VMware), network technology, databases, applications and Microsoft cloud services (O365, Azure and Intune).
- Working knowledge of virus/intrusion prevention systems.
- Working knowledge of Power Automate an advantage.
- Knowledge of FC and Ethernet switching an advantage.
- Self-starter, deadline driven, structured and independently competent.
- Able to work in a team.
- Fluently speak, read and write German, good understanding of English.

### Specific features

- Collaborate with a global IT team
- Possibility of global travel

### What you can expect

As an IT infrastructure specialist, you can expect varied tasks in a technical, international environment. You will be supported by a dynamic, highly motivated team.

We offer you excellent development and training opportunities and you benefit from flexible working hours and attractive remuneration.

### And now it's your turn!

Your questions will be answered by Mr. Robert Weisel.
